The links provide access to the consolidated texts of the legislation which are accessible in all official Union languages on the EUR-Lex website.

Through consolidation, the basic instruments of European Union legislation, their amendments and corrections at the moment of the release of the consolidated version are integrated into a single, non-official document. Newer legislation is not implemented into the consolidated version before sometime after publication and thus have to be read in addition to the consolidated version.

These texts have no legal value and they are intended only for use as documentation tools. The Institutions do not assume any liability for their content.

Subject (short title of legislation). Lists of references of harmonised standards and general information (column 3)

The links provide access to general information about the legislation, to the publications of the references of harmonised standards in the Official Journal and to the summary lists of titles and references to harmonised standards of the corresponding legislation.

The information contained in the summary lists is a compilation of the references of standards which have been published in the Official Journal of the European Union.

Although the lists are updated regularly, they may not be complete and they do not have any legal validity; only publication in the Official Journal produces legal effect.

Information about references of harmonised standards which were recently published in the Official Journal is available on the following website:
http://ec.europa.eu/growth/single-market/european-standards/harmonised-standards/index_en.htm
